

PUTTING THE PROTECTOR ON YOUR COUCH & WASHING INSTRUCTIONS

Thank you for purchasing the Couch Protector. We hope you and your pet enjoy it and use it to protect your couch for many years to come.

Putting The Protector On Your Couch:

Step 1:

To install the Couch Protector, you first need to decide if you like the corduroy microfiber side, or the fleece side, to face up. Your Couch Protector is completely reversible.

Step 2:

Place the Couch Protector onto your seat, loveseat, or sofa. Adjust the Protector so the furniture is completely covered including the seat, seat back and armrests.

Step 3:

To anchor the Couch Protector to your couch attach the webbing straps to legs of the couch. Your Couch Protector will stay neatly in place. There are a total of six different webbing straps included with your Couch Protector. Attaching the webbing straps can be done easily and does not require you to lift your furniture. Simply undo the side release buckle farthest away from the Couch Protector, slip the webbing around the furniture legs, and close the side release buckles.

If you chose not to attach the webbing straps to the legs of your sofa, the webbing straps can be detached from the Couch Protector. Simply undo the side release buckles closest to the Protector.

You may also choose not to anchor the Defender to your furniture at this time. Simply store the adjustable anchors in a safe place should you choose to use them in the future.

Step 4 – The Most Important Part:

Call your four legged best friend to test out the new Couch Protector. Finally, watch your pet enjoy your couch.

Washing Instructions:

Remove the adjustment straps before washing and drying the Couch Protector.

Machine Wash with cold water on a gentle setting using a mild laundry detergent, such as Woolite®. Wash and dry separately from other items. Tumble machine dry on a cool to warm setting. Do not use bleach, and do not dry clean as these will damage the upholstery grade fabrics.

In the event of a pet ‘accident’ on the Protector we recommend using an enzyme based urine treatment, such as “Urine Off®”, directly on the accident. Allow the enzyme to dry completely before machine washing and drying the Bed. Should urine odors persist you can reapply the treatment and/or contact the enzyme manufacturer for further recommendations.

We hope you have many years enjoying your Couch Protector with your four legged member of the family.
