

Hooded Bed

Putting Together Your Hooded Bed & Washing Instructions

Thank you for purchasing the Hooded Bed. Your four legged friends will find the bed cozy and very comfortable. With proper care, your bed will provide years of happy use. The bed is fast and easy to put together.

Step 1 – Putting the Bed Together:

The bed cover is packed separately from the stuffed pillows in the box. Ensure that you have received: i) one bed cover; ii) one stuffed bolster pillow (that fills the surrounding bolster); iii) one filled base (which is the cushion where your dog will lie down), iv.) one zippered hood (the top of the bed), and one plastic bag with extra compressed polyester fiber fill.

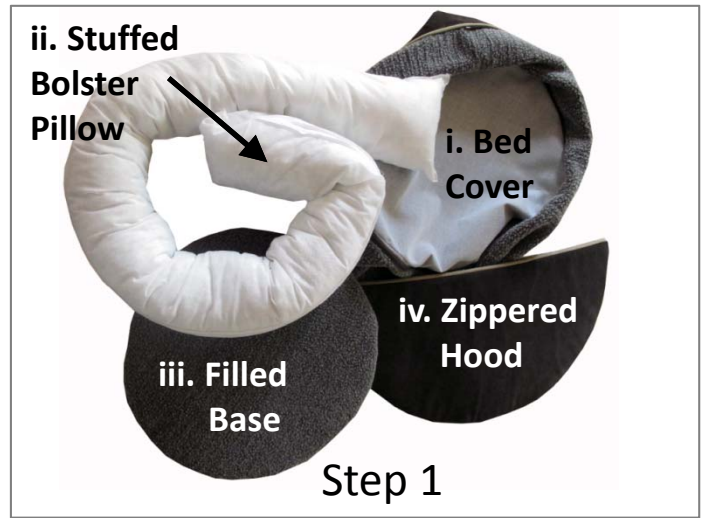

Step 2:

Open and decompress the stuffed bolster pillow. Shake the long thin pillow equally distributing the fill in the pillow. (Note that it can take as long as 24 hours for the polyester fiber fill in the liners to fully expand.) If you want extra firmness in the bolster, you can insert more polyester fill from the plastic bag with extra polyester fill.

Step 3 – Insert the Bolster Pillow:

Unfold the bed cover. It is easier to put the bolster pillow into the cover with the bed cover turned inside out. The fleece on the bed cover should be facing out. Find and open the bolster zipper on the bed cover. Work the bolster pillow into the bed cover. Slowly close the zipper as you work the pillow into the bolster. Be sure to close the zippers slowly. You may need to use both hands to close the zippers.

Step 3 Continued...

Having someone else's help is even better. Have your helper hold the two sides of the zipper together as you gently close the zippers. When inserting the bolster pillow make sure one end of the pillow meets the other end of the pillow in the bed cover (this ensures there won't be any gaps in fill in the bolster).

Step 4:

Flip the bed cover so it is no longer inside out (the bolster fleece should now be inside the bed). Work the filled base into the bottom of the bed. The mat base will need to get pushed under the bottom of the bolster. The base is a polyester mat that will keep the shape of the bed.

Step 5:

Zip the bed hood onto the bed cover. The fleece part of the cover goes inside the bed. The bed is now ready for your best four legged friend to use.

FLAMMABILITY WARNING

Do not expose this product to open flames or any other direct source of indirect high temperature ignition sources, such as burning fire places, burning cigarettes, space heaters, or naked lights. Once ignited, polyester fiber will burn rapidly, releasing great heat and consuming oxygen at a high rate. In an enclosed space, the resulting lack of oxygen will present a danger of suffocation to the occupants. Hazardous gases released by the burning fiber can be incapacitating, or fatal, to human beings and pets if inhaled in sufficient quantities.

This warning applies to polyester fibers in general and they should not be construed that this bed is any more hazardous than those of other polyester fibers, or beds. All polyester fiber is dangerous if ignited.

Work the filled base into the bottom of the bed.

Step 5

Washing Instructions:

Your Hooded Bed is fast and easy to wash and dry. Remove the filled liners. Wash and dry the bed cover and hood separately from other items. The bed's liners, pillows and polyester fiber fill should not be washed.

Machine wash the bed cover and hood with cold water on a gentle setting using a mild laundry detergent, such as Woolite®.

Machine dry the bed cover on a cool to warm setting. Hang the bed hood to dry.

Do not use bleach, and do not dry clean as these will damage the upholstery grade fabrics.

In the event of a pet 'accident' we recommend using an enzyme based urine treatment directly on the accident. Follow the enzyme treatment instructions. For most treatments, allow the enzyme to dry completely before machine washing and drying the bed cover. Should urine odors persist you can reapply the treatment and/or contact the enzyme manufacturer for further recommendations.
