

Microfiber & Foam Safety Seat Expander

Assembly, Installation and Washing Instructions

Thank you for purchasing the Microfiber & Foam Safety Seat Expander. On road trips, the seat expander will help your dog be safer and more comfortable. With proper care, your seat expander will provide years of happy use.

The seat expander is fast and easy to put together. The microfiber fabric cover, the waterproof/ breathable liner, and the foam are separated in the shipping box.

Step 1:

Ensure that you have received: one (1) microfiber seat expander cover; one (1) white waterproof breathable liner; and one (1) wedge of polyurethane foam.

Step 2:

Locate the white liner. This waterproof/breathable liner will protect the foam from water, spills and accidents. Open the zipper on the liner. Orient the foam by placing the wide part of the foam into the bottom of the liner. Gently pull the fabric around the foam and close the zipper.

Step 3:

Locate the microfiber cover. Open the zipper on the cover. Orient the foam and liner and place the wide edge of the foam and liner into the bottom of the cover. Gently pull the microfiber cover around the foam and liner. Close the zipper.

The seat expander is ready to be put into your vehicle.

Step 4:

The seat expander is designed to go in the backseat foot well between the back of the front seat and the front part of the back seat. This area is where humans would normally put their feet when they sit in the backseat.

Note that the Seat Expander is not suitable for use by, or for, children.

Installing Your New Microfiber Door Protectors

Step 4 Continued...:

Move the front seat as far forward as possible. Orient the seat expander with the narrow part of the expander pointing down. Place the expander in the foot well with the wide part of the expander pointing up. You may need to push the expander into place.

Step 5:

Move the front seat back to where you want the seat to be. The front seat will push against and compress the seat expander securing it in place. Note that if the seat expander prevents the front seat from going as far back as you want, move the front seat forward, and flip the seat expander over so the narrow part of the expander faces up. This will give you more flexibility to move the front seat further back.

Note that you need two seat expanders to fill both foot wells in the back seat.

Washing Instructions:

The Microfiber and Foam Seat Expander is fast and easy to clean.

The expander has a zippered cover and liner that must be removed before washing and drying. Machine wash the cover and liner with cold water on a gentle setting using a mild laundry detergent, such as Woolite. Wash and dry the cover and liner separately from other laundry items. Tumble machine dry on a cool to warm setting. Do not use bleach, and do not dry clean as these will damage the upholstery grade fabrics.

The foam will absorb water and should not be washed, or hosed off.

In the event of a pet 'accident' we recommend using an enzyme based urine treatment, such as "Urine Off", directly on the accident. Allow the enzyme to dry completely before machine washing and drying the cover and liner. Should urine odors persist you can reapply the treatment and/or contact the enzyme manufacturer for further recommendations.
